

- Supervision of two or three-phase power sources
- Emergency demand supervision for standby generating set
- Tie-breaker management
- Control of contactors, motorised circuit breakers and motorised changeover switches
- Closed transition
- Automatic non-priority load management
- Event logging
- Remote control and supervision
- Front optical port
- Built-in NFC technology
- Expandable with EXP modules
- Communication protocols Modbus-ASCII, RTU and TCP
- Real time clock
- Enclosed automatic transfer switches ATS.

Automatic transfer switch controllers for 2 power sources

ATL100 type modular version for controlling 2 power sources with single-phase control	27 - 7
ATL500 type non expandable with synoptic and NFC for controlling 2 power sources	27 - 7
ATL600 and ATL601 type non expandable for controlling 2 power sources.....	27 - 8
ATL610 type expandable with EXP modules for controlling 2 power sources	27 - 8
ATL800 type expandable with EXP modules for controlling 2 power sources and 1 tie breaker	27 - 9

Automatic transfer switch controllers for 3 power sources

ATL900 type expandable with EXP modules for controlling 3 power sources and 2 tie breakers	27 - 10
--	---------

Enclosed automatic transfer switches ATS

ATP series with ATL600 automatic transfer switch controller and contactors	27 - 11

ATL100

- Modular housing
- Management of two power sources
- Single-phase control.

Page 27-7

ATL500

- Management of two power sources
- Self-seeking power supply
- 2 programmable digital inputs
- 3 programmable digital outputs
- Built-in NFC technology for parameter settings with App **NFC**.

Page 27-8

ATL600 - ATL601

- Management of two power sources
- AC power supply
- 6 programmable digital inputs
- 7 programmable relay outputs.

Page 27-8

ATL610

- Management of two power sources
- AC and DC power supply
- 6 programmable digital inputs
- 7 programmable relay outputs
- Real time clock (RTC)
- Expandable with EXP series modules (inputs and outputs, communication ports).

Page 27-9

ATL800

- Management of 2 power sources and 1 tie breaker
- AC and DC power supply
- 8 programmable digital inputs
- 7 programmable relay outputs
- Built-in NFC technology for parameter settings with App **NFC**
- Real time clock (RTC)
- Non-priority load management
- Closed transition with brief parallel configuration
- Built-in RS485 communication
- Built-in PLC logic
- Expandable with EXP series modules (inputs and outputs, communication ports).

Page 27-10

ATL900

- Management of 3 power sources and 2 tie breakers
- AC and DC power supply
- 12 programmable digital inputs
- 4 current inputs
- 10 programmable relay outputs
- 1 programmable static output
- Built-in NFC technology for parameter settings with App **NFC**
- Real time clock (RTC)
- Non-priority load management
- Closed transition with brief parallel configuration
- Built-in RS485 communication
- Built-in PLC logic
- Expandable with EXP series modules (inputs and outputs, communication ports).

Page 27-11

ATP

- Enclosed automatic transfer switches from 45 to 160A
- Management of 2 power sources
- Four-pole interlocked contactors
- Automatic transfer switch controller type **ATL600**
- Dual power supply module type **ATLDPS1** for the measurement and control of voltages present at supply inputs
- Miniature circuit breakers for the protection of the measuring lines
- Metallic enclosure IP65.

Page 27-12

ATLDPS1

- Module specifically designed to control power supply voltage of motorised circuit breakers and changeover switches
- Continuous monitoring of supply line status
- Management via microcontroller management.

27 Automatic transfer switch controllers

For 2 power sources.
ATL500

SIMPLE AND READY TO USE

SYNOPTIC

The frontal synoptic provides a simple and clear view of the status of the plant, signalling with LEDs the status of the power sources and the status of the changeover devices.

FRONTAL KEYBOARD

With the frontal keyboard it is possible to select the operating mode (manual or automatic) and command manually the switching between the power sources directly with the buttons I-O-II on the front, without need to program any setting on the controller.

SELF-SEEKING POWER SUPPLY

ATL500 has a self-seeking power supply, which automatically selects the best of the two available power sources for the internal supply, taken directly from the two measuring inputs (rated voltage 110...240VAC L-N), without the need of an external circuit or dual power supply module for the selection of the power for the auxiliary supply.

THREE-PHASE WITH NEUTRAL VOLTAGE MONITORING INPUTS

ATL500 is provided with three-phase with neutral voltage monitoring inputs for a complete monitoring of the voltage and frequency of both power sources. The controller can be configured to be used in three-phase with neutral, single-phase or two-phase systems.

PROGRAMMABLE DIGITAL INPUTS AND OUTPUTS

The function of the programmable digital inputs and outputs can be configured via NFC to satisfy different application needs.

HIGH PROTECTION DEGREE

The controller front and the optional frame seal have been designed to warrant an IP65 protection degree.

NFC CONNECTION

ATL500 is provided with built-in NFC connectivity for the programming via Android and iOS smart devices (smartphone and tablets) with the LOVATO NFC App in a simple, fast and innovative way, which does not need any connection cable and is able to operate even without power supply on the controller.

With the LOVATO NFC App it is possible to configure:

- system parameters: rated system voltage, rated frequency, type of wiring, voltage control mode, etc.
- password for the protection of the access to the settings
- changeover settings: priority line selection, interlock times, feedback delays, etc.
- protection thresholds and tripping delays: min/max voltage, min/max frequency, phase sequence, asymmetry
- function of the programmable digital inputs and outputs
- function of the potentiometers
- alarms properties.

POTENTIOMETERS

ATL500 is provided with two potentiometers on the back, one for each power source, which can be used for the manual setting of the line presence delays (default setting) or to set the tripping delays of the protection thresholds, in alternative to the setting via NFC. The function of the potentiometers can be modified with the LOVATO NFC App.

LINE 2
0...60 sec

27 Automatic transfer switch controllers

For 2 power sources.
ATL600 - ATL601 - ATL610

NON-STOP CONTROL!

- **BACKLIT GRAPHIC LCD DISPLAY**
128x80 pixel, with excellent legibility with adjustable brightness and display of events, alarms and measurements in 5 languages: English, Italian, French, Spanish and German.

- **OPTICAL COMMUNICATION PORT**

The optical port on the front, using a standard USB or Wi-Fi point, permits to communication with a PC, smartphone and tablet, to carry out programming, diagnostics and data download without removing power to the electric panel.

- **COMPACT SIZE**

Slim frame profile and reduced total depth simplify installation of the transfer switch controller also in very compact electric panels.

- **HIGH PROTECTION DEGREE**
The controller front and the optional frame seal have been designed to warrant an **IP65** protection degree.
- **MAINTENANCE COUNTERS**
ATL features two counters used for maintenance; the first monitors the operating time and the second counts the number of switching operations. Exceeding the limit set on the counters activates the corresponding alarm.

- **FIXING SYSTEM**

The fixing system with **metal screws** guarantees excellent, lasting hold over time.

- **STATISTICS AND EVENTS**
The recorded statistical data is available to the user for understanding how the system operates. A cyclical internal memory records up to 100 events.
- **EMERGENCY DEMAND SUPERVISION FOR STANDBY GENERATING SET**
In applications where one of the two supply sources is a generating set, the transfer switch controller has specific functions to supervise the generator starting and stopping operations.

- **INPUTS, OUTPUTS, INTERNAL VARIABLES, COUNTERS**

The inputs and outputs can be configured by the user to manage the various application requirements. Also available to the user are limit thresholds, counters, user alarms and remote control variables (**ATL610** only) to customise the control functions. The limit and counter statuses, if enabled, are shown in the appropriate pages on the display.

- **CALENDAR CLOCK (ATL610)**
Built-in calendar-clock with backup reserve power.
- **DUAL POWER SUPPLY (ATL610)**
110...240VAC and 12/24VDC supply.

- **EXPANDABILITY (ATL610)**
Basic functions of the transfer switch controllers can be easily extended using EXP series expansion modules:
 - Relay outputs
 - Digital and analogue inputs and outputs
 - Opto-isolated RS232 interface
 - Opto-isolated RS485 interface
 - Opto-isolated Ethernet interface.
 Using modules dedicated to communications the device can be controlled and supervised by the **Synergy** and **Synergy** softwares and controlled remotely and configured with the **Xpress** software.

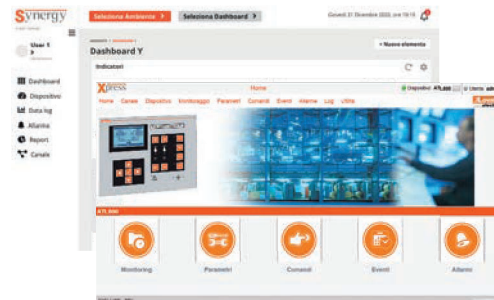

12/24VDC battery supply input (only for **ATL601** and **ATL610**)

VERSATILE CONFIGURATION

ATL800

- Management of 2 energy sources and 1 tie breaker.
- 6 preconfigured system layouts.
- Non-priority load management.
- Management of transition with brief parallel configuration.
- RS485 built-in.
- Built-in NFC technology for parameter settings with App **NFC**.
- App and software: **Synergy**, **Xpress**, **Sam1**, **NFC**.

● GRAPHIC LCD AND 8 LANGUAGE TEXT

The backlit graphic display simplifies the user interface and permits good visibility in environments with poor lighting. For ATL800 and ATL900 the texts are available in 8 languages: English, Italian, French, Spanish, German, Portuguese, Polish and Russian.

The new interface allows the user to see, clearly and simply:

- System status
- Measurements
- Statistical data
- Threshold control
- Alarm pop-up windows.

● MAINTENANCE COUNTERS

Two counters can be used for scheduling maintenance on the transfer systems installed: the first for recording the operating time and the second for monitoring the number of switching operations. Exceeding the limit set on the counters activates the corresponding alarm.

● INPUTS, OUTPUTS, INTERNAL VARIABLES, COUNTERS

The input and output functions are preconfigured with the most frequently used settings; the user can easily modify the predefined configuration and adapt the switch to their application requirements. All the inputs and outputs can be configured. There are various types of programmable internal variables:

- Limit thresholds
- Remote control variables
- User alarms
- Programmable counters
- Timer.

The limit, counter and enabled timer statuses are available for display on dedicated pages.

● HIGH PROTECTION RATING

The controller front and the frame seal have been designed to warrant an **IP65** protection degree.

● STATISTICS AND EVENTS

The statistical data recorded by the transfer switch controller is available to the user for analysing the performance of the switching system. A cyclical internal memory records up to 250 events, providing useful information on the history of the system controlled.

● BUILT-IN CALENDAR CLOCK

A built-in calendar clock with backup reserve energy permits each event to be identified using the time and date on which it occurred.

● BUILT-IN RS485 COMMUNICATION

Thanks to the built-in RS485 communication port, ATL800 and ATL900 are already set up for remote supervision and control. In addition to this communication port, the user can install two further types of communication from those available in the EXP... expansion modules.

● DUAL AC/DC SUPPLY

ATL switches can deal with all supply solutions demanded by the market. The best and safest solution is the simultaneous use of AC and DC supply. The switches can then be supplied by the AC line available and, during switching, in the absence of the AC line, the switch will be supplied by the battery via the DC inputs. Non-stop control! AC supply ensures supply during system monitoring and DC supply guarantees constant supply during switching.

● PROGRAMMABLE PLC LOGIC

With the built-in PLC functions, new switching logic can be defined through appropriate combinations of input, output and internal variable signals.

● TIMER

8 timer variables are available for use in the system's PLC logic, in combination with the outputs or user alarms. Each timer variable has an input variable that controls it. When this variable changes state, so does the timer variable, but it remains in the new state only for the time specified then returns automatically to the starting condition.

● NFC CONNECTION

Programming the parameters via tablet and smartphone is now possible also through NFC wireless technology. Bringing a smartphone or tablet with NFC connection enabled close to the display of the ATL800-900 activates the **NFC** App LOVATO and the switch connected is recognised automatically. It will then be possible to modify the parameters and program the ATL.

● USB AND WI-FI COMMUNICATION INTERFACES

ATL800 and ATL900 feature a front optical port for programming via optional USB (CX01) or Wi-Fi (CX02) communication interface.

Advantages:

- Not necessary to disconnect the supply from the panel to connect to the switch
- Electrical safety (no physical connection)
- Convenience of operating on the front.

27 Automatic transfer switch controllers

For 2 and 3 power sources.
ATL800 - ATL900

FULL OPTIONAL, FOR EVERY REQUIREMENT

ATL900

- Management of 3 energy power sources and 2 tie breakers.
- 4 current inputs for the three-phases and neutral.
- 14 preconfigured system layouts.
- Non-priority load management.
- Management of transition with brief parallel configuration.
- RS485 built-in.
- Built-in NFC technology for parameter settings with App **NFC**.
- App and software: **Synergy**, **Xpress**, **Sam1**, **NFC**.

● WI-FI COMMUNICATION INTERFACE (VIA CX02)

This connection can be used to:

- Copy the parameters
All the parameters of the ATL can be saved in the CX02 memory and if necessary loaded back into the same device (backup function) or a new switch (replication of the configuration).
- Clone the device settings
In addition to copying the parameters, the current values of the statistical data, counters and events can be saved in the memory in order to completely replicate an ATL on another device of the same type or restore the ATL to a previously saved state.

THREE TYPES OF TRANSITION AVAILABLE

Open transition

The switch transfers the load between the two sources, interrupting the supply for a period of time that can be programmed by the user.

In-phase transition

The switch transfers the load between the two sources, interrupting the supply for a period of time that can be programmed. In this case the load is passed to a new source if spontaneous synchronisation is found; the amplitude, phase and frequency of the two sources must not differ from the maximum value set.

Closed transition

With switches and external protections, configured appropriately, the two sources will be synchronised (where possible) or spontaneous synchronisation will be expected within a limit time. In presence of all synchronisation conditions the load will be transferred with closed transition and instantaneous parallel without interrupting supply.

ATL900: management of three sources and two tie breakers

A single transfer switch controller can be used to manage applications which in the past required several transfer switch controllers in a cascade connection.

24 system layouts are available.

4 current inputs

The current inputs permit the monitoring of the demand load and defining of the correct switching strategy. Knowing the power demanded by the system and the rated power of the sources, ATL900 can select the best source available that can supply the loads correctly.

● EXPANDABILITY

ATL800 and ATL900 functionality can be extended thanks to the EXP... series expansion modules. Three expansion slots are available, and while the switch is restarting the modules are recognised and configured entirely automatically. The following EXP... modules are available:

- Digital I/O modules
- Analogue I/O modules
- USB, RS232, RS485, Ethernet and Profibus communication modules
- GPRS/GSM modem

Since the additional modules are shared with other LOVATO Electric products, it is possible to save in management costs, guaranteeing flexibility and ease of installation, above all when the system has already been commissioned.

27 Automatic transfer switch controllers

For 2 power sources

Non expandable modular

ATL100

Order code	Description	Qty per pkg	Wt
		n°	[kg]
ATL100	Automatic transfer switch controller for 2 power sources with single-phase control, modular housing, 110...230VAC supply	1	0.300

General characteristics ATL100

ATL100 is a single-phase automatic transfer switch controller in modular housing. It monitors 2 single-phase voltage inputs and it connects to the output the line that is within the limits. The priority line is the line 1. The 2 outputs can control contactors or motorized changeover switches to perform the transfer between the lines.

Operational characteristics ATL100

- Self-powered
- Input voltage range: 80...300VAC
- Frequency range: 45...66Hz
- 2 relay outputs with 1 NO contact 4A 250VAC
- 1 relay output with 1 NO contact 3A 250VAC.

Non expandable flush-mount

ATL500

new

Order code	Description	Qty per pkg	Wt
		n°	[kg]
ATL500	Automatic transfer switch controller with NFC technology and synoptic, for 2 power sources with three-phase control (144x144mm/5.7x5.7"), self-seeking power supply 110...240VAC	1	0.580

General characteristics ATL500

ATL500 is an automatic transfer switch controller for the automatic or manual switching of the load from the MAIN LINE to a stand-by or emergency SECONDARY LINE and vice versa.

With the integrated outputs, it is possible to control contactors or motorized changeover switches.

The main features are:

- Self-seeking power supply from the two measurement inputs
- Measurement inputs for three-phase + neutral voltage values, also suitable for 1 and 2 phase lines
- Synoptic on front with LEDs for a simple and clear visualisation of the status of the lines and the changeover devices
- Parameter programming via NFC technology and **NFC App** LOVATO downloadable from Google Play Store and App Store. With **NFC App** LOVATO is possible to set: rated system parameters, line control settings, changeover settings, password and I/O functions
- Frontal keyboard for the selection of the operating mode and the manual command of the changeover devices
- 2 programmable digital inputs
- 3 programmable relay outputs
- Potentiometers on the back for the manual setting of the line presence delays or the tripping delays of the protection thresholds.

Operational characteristics ATL500

- Power supply:
 - Self-seeking power supply from the measurement inputs 110...240VAC L-N (range: 90...300VAC L-N)
- Voltage measurement inputs:
 - Rated voltage U_e : 110...240VAC L-N / 190...415VAC L-L
 - Measuring range: 90...300VAC L-N / 155...519VAC L-L
 - Frequency range: 45...66Hz
- Programmable digital inputs:
 - Negative inputs
- Programmable relay outputs:
 - 2 each with 1 normally open contact (NO - SPST) rated 8A 250VAC
 - 1 with 1 changeover contact (NO/NC - SPDT) rated 8A 250VAC
- Enclosure:
 - Flush-mount housing: 144x144mm/5.7x5.7"
 - IEC degree of protection: IP40 on front; IP65 with optional seal EXP8001; IP20 at rear.

Certifications and compliance

Certifications obtained: EAC, RCM (only for ATL500).
Compliant with standards: IEC/EN/BS 61010-1, IEC/EN/BS 61010-2-030, IEC/EN/BS 60947-1, IEC/EN/BS 60947-6-1, IEC/EN/BS 61000-6-2, IEC/EN/BS 61000-6-3.

EXP... expansion modules fixing on ATL610

General characteristics ATL600 - ATL601 - ATL610

The automatic transfer switch controllers ATL600 / ATL601 / ATL610 are used for the automatic or manual switching of the load from the MAIN LINE to a stand-by or emergency SECONDARY LINE and vice versa. They have two outputs for the "automatic" and/or "manual" control of contactors or motorised circuit breakers and switches.

The main features are:

- Supply input:
 - Single in AC for ATL600
 - Single in DC for ATL601
 - Dual in AC and DC for ATL610
- Measurement inputs for three-phase + neutral voltage values; also suitable for 1 and 2 phase lines
- 128x80 pixel backlit graphic LCD to view measurements, events and alarms in 5 languages (English, Italian, French, Spanish and German)
- 2 status indication LEDs
- 6 programmable digital inputs
- 7 programmable relay outputs
- Viewing of L-L and L-N voltage values of the controlled lines
- Status viewing of contactor or motorised circuit breakers and switches
- Configuration programming of lines, control and supervision parameters for emergency demand of generating set
- Event logging
- Microprocessor supervision of functions; including virtual real time clock for ATL610
- Communication interface by front optical port with CX01 or CX02 dongle using USB or Wi-Fi
- Compatible with **Synergy**, supervision and energy management software, **Xpress** remote control and configuration software and with the **Satmi** application for Android/iOS
- Modbus-RTU, ASCII and TCP communication protocol.

CONTROL FUNCTIONS OF THE LINES

- Phase sequence and phase loss
- Minimum and maximum voltage
- Voltage asymmetry
- Minimum and maximum frequency.

Operational characteristics ATL600 - ATL601 - ATL610

- Power supply:
 - Power supply voltage: 110...240VAC (ATL600); 12/24VDC (ATL601); 12/24VDC - 110...240VAC (ATL610)
- Voltage measurement inputs:
 - Rated voltage Ue: 100...480VAC (L-L)
 - Measuring range: 50...576VAC (L-L)
 - Frequency range: 45...66Hz
- Programmable digital inputs:
 - Negative inputs
- Programmable relay outputs:
 - 6 each with 1 normally open contact (NO - SPST) rated 8A 250VAC
 - 1 with changeover contact (NO/NC - SPDT) rated 8A 250VAC
- Enclosure:
 - Flush-mount housing: 144x144mm/5.7x5.7"
 - IEC degree of protection: IP40 on front; IP65 with optional seal EXP8001; IP20 at rear.

Certifications and compliance

Certifications obtained: cULus, RCM, LOVAG (only for ATL600 - ATL610), EAC.
Compliant with standards: IEC/EN/BS 61000-6-3 (only for ATL601), IEC/EN/BS 61000-6-4 (only for ATL600 - ATL610), IEC/EN/BS 60947-1, IEC/EN/BS 60947-6-1, IEC/EN/BS 61000-6-2, IEC/EN/BS 61000-6-3, UL508, CSA C22.2 n° 14.

EXP... expansion module fixing on ATL800

MAX 3

General characteristics

The automatic transfer switch controller **ATL800** is used for the automatic or manual switching of the load between two lines in accordance with the selected switching logic. It has outputs for the "automatic" and/or "manual" control of contactors or motorised circuit breakers and switches. It can also manage a third control device as tie breaker or non-priority load management. The layout and system status are displayed directly on the graphic LCD.

The main features are:

- AC and DC supply inputs
- Measurement inputs for three-phase + neutral voltage values; also suitable for 1 and 2 phase lines
- 128x80 pixel backlit graphic LCD to view measurements, events and alarms in 8 languages (English, Italian, French, Spanish, German, Portuguese, Polish and Russian)
- Active operating mode indicator LED
- Viewing of L-L and L-N voltage values of the controlled lines
- Viewing the status of contactors or motorised circuit breakers both via display and LED
- 6 system layouts available
- Management of a tie breaker
- 8 programmable digital inputs
- 7 programmable relay outputs
- Viewing of L-L and L-N voltage values of the controlled lines
- Configuration programming of lines, type of source (line/generator), control and supervision parameters for emergency demand of generating set
- Possibility of transferring load with closed transition and spontaneous or controlled genset synchronisation
- Non-priority load management
- Built-in programmable PLC logic
- Built-in RS485 communication
- Event logging
- Virtual calendar clock (RTC)
- Communication interface by front optical port with CX01 or CX02 dongle using USB or Wi-Fi
- Parameter programming via NFC technology and the App **NFC** downloadable from Google Play Store and App Store
- Compatible with **Synergy**, supervision and energy management software, **Xpress** remote control and configuration software and with the **Sam1** application for Android/iOS
- Modbus-RTU, ASCII and TCP communication protocol.

CONTROL FUNCTIONS OF THE LINES

- Phase sequence and phase loss
- Minimum and maximum voltage
- Voltage asymmetry
- Minimum and maximum frequency.

Operational characteristics

- Power supply:
 - Power supply voltage: 100...240VAC; 12/24/48VDC
- Voltage measurement inputs:
 - Rated voltage U_e : 100...600VAC (L-L)
 - Frequency range: 45...66Hz
- Programmable digital inputs:
 - Negative inputs
- Programmable relay outputs:
 - 2 each with 1 normally open contact (NO - SPST) rated 12A 250VAC
 - 2 each with 1 normally open contact (NO - SPST) rated 8A 250VAC
 - 3 each with 1 changeover contact (NO/NC - SPDT) 8A 250VAC
- Enclosure:
 - Flush-mount housing: 180x240mm/7.09x9.45"
 - IEC degree of protection: IP65 on front; IP20 at back.

Certifications and compliance

Certifications obtained: cULus, EAC, RCM, LOVAG.
Compliant with standards: IEC/EN/BS 61010-1, IEC/EN/BS 61010-2-030, IEC/EN/BS 61000-6-2, IEC/EN/BS 61000-6-4, IEC/EN/BS 60947-1, IEC/EN/BS 60947-6-1, UL508 and CSA C22.2 n° 14.

EXP... expansion module fixing on ATL900

MAX 3

General characteristics

The automatic transfer switch controller ATL900 is used for the automatic or manual switching of the load between three lines in accordance with the selected switching logic. It has outputs for the "automatic" and/or "manual" control of contactors or motorised circuit breakers and switches. It can also manage two more control devices as tie breakers or non-priority load management. It has four current inputs for managing switching with power thresholds. The layout and system status are displayed directly on the graphic LCD. The main features are:

- AC and DC supply inputs
- Measurement inputs for three-phase + neutral voltage values; also suitable for 1 and 2 phase lines
- 4 current measurement inputs
- 128x112 pixel backlit graphic LCD to view measurements, events and alarms in 8 languages (English, Italian, French, Spanish, German, Portuguese, Polish and Russian)
- Active operating mode indicator LED
- Viewing of L-L and L-N voltage values of the controlled lines
- Viewing the status of contactors or motorised circuit breakers both via display and LED
- 6 system layouts available
- Management of a tie breaker
- 12 programmable digital inputs
- 10 programmable relay outputs
- 1 static output
- Viewing of L-L and L-N voltage values of the controlled lines
- Configuration programming of lines, type of source (line/generator), control and supervision parameters for emergency demand of generating set
- Possibility of transferring load with closed transition and spontaneous or controlled genset synchronisation
- Non-priority load management
- Built-in programmable PLC logic
- Built-in RS485 communication
- Event logging
- Virtual calendar clock (RTC)
- Communication interface by front optical port using USB CX01 or Wi-Fi CX02 dongle
- Parameter programming via NFC technology and the App **NFC** downloadable from Google Play Store and App Store
- Compatible with **Synergy**, supervision and energy management software, **Xpress** remote control and configuration software and with the **Sam1** application for Android/iOS
- Modbus-RTU ASCII and TCP communication protocol.

CONTROL FUNCTIONS OF THE LINES

- Phase sequence and phase loss
- Minimum and maximum voltage
- Voltage asymmetry
- Minimum and maximum frequency.

Operational characteristics

- Power supply:
 - Power supply voltage: 100...240VAC; 12/24/48VDC
- Voltage measurement inputs:
 - Rated voltage Ue: 100...600VAC (L-L)
 - Frequency range: 45...665Hz
- Programmable digital inputs:
 - Negative inputs
- Programmable relay outputs:
 - 3 each with 1 normally open contact (NO - SPST) rated 12A 250VAC
 - 3 each with 1 normally open contact (NO - SPST) rated 8A 250VAC
 - 4 each with 1 changeover contact (NO/NC - SPDT) 8A 250VAC
 - 1 30VDC 50mA static output
- Enclosure:
 - Flush-mount housing: 180x240mm/5.7x5.7"
 - IEC degree of protection: IP65 on front; IP20 at back.

ATP0125T4A230C600A	125	87	600x400x250 (23.62x15.75x9.84")
ATP0160T4A230C600A	160	111	600x400x250 (23.62x15.75x9.84")

General characteristics

The enclosed automatic transfer switches ATP series are provided in metallic enclosure IP65, complete with automatic transfer switch controller type ATL600, four-pole contactors BF series, dual power supply module type ATLDPS1 and miniature circuit breakers (MCB) type P1MB for the protection of the measuring lines.

They are used for the automatic or manual switching of the load between two lines ("MAIN LINE" and "SECONDARY LINE").

They are available in versions from 45 to 160A in four-pole configuration.

CONTROL FUNCTIONS OF THE LINES

- Phase sequence and phase loss
- Minimum and maximum voltage
- Voltage asymmetry
- Minimum and maximum frequency

Operational characteristics

- Power supply:
 - Auxiliary supply voltage: 230VAC (taken from the input lines)
- Voltage measurement inputs:
 - Rated voltage U_e : 100...480VAC (L-L)
 - Measuring range: 50...576VAC (L-L)
 - Frequency range: 45...66Hz
- 6 programmable digital inputs
- 7 programmable relay outputs:
 - 6 each with 1 normally open contact (NO-SPST) rated 8A 250VAC
 - 1 with 1 changeover contact (NO/NC - SPDT) rated 8A 250VAC
- Enclosure:
 - Metallic enclosure
 - Flanges for cable entries in the top and bottom sides
 - PVC locking system with double-comb tool insert
 - Opening with left hinges
 - IEC degree of protection: IP65.

Certifications and compliance

Certification obtained: EAC.

Compliant with standards: IEC/EN/BS 61439-2.

Dual power supply module

ATLDPS1

Order code	Description	Qty per pkg	Wt
		n°	[kg]
ATLDPS1	For controlling and selecting supply for motorised circuit breakers and changeover switches 110...230VAC configurable	1	0.300

	110VAC		230VAC	
	MIN	MAX	MIN	MAX
Line absent	< 88V	> 152V	< 176V	> 288V
Line present	< 92V	> 144V	< 185V	> 273V

Using the thresholds above **ATLDPS1** outputs one of the power supplies available according to the logic shown in the table:

Status Line 1	LED Line 1	Status Line 2	LED Line 2	Output	LED Output	ATLDPS1	Alarm contact	LED Fault
OK	ON	<MIN OR >MAX	OFF	ON - from line 1	ON	ON - OK	Closed	OFF
OK	ON	OK	ON	ON - from line 1	ON	ON - OK	Closed	OFF
<MIN OR >MAX	OFF	OK	ON	ON - from line 2	ON	ON - OK	Closed	OFF
<MIN >MAX	OFF	<MIN >MAX	OFF	OFF	OFF	OFF	Open	OFF
<MIN OR >MAX	OFF	<MIN OR >MAX	OFF	OFF	OFF	ON	Open	ON

		<MIN OR >MAX	OFF					
OK	ON	OFF	>MIN	ON	OFF	OFF	Open Internal relays	ON
<MIN OR >MAX		OFF	>MIN	ON	OFF	OFF	Open Internal relays	ON

General characteristics

ATLDPS1 is capable of measuring and controlling voltages at its inputs selecting the most ideal to connect to the output. It is suitable to supply motorised circuit breakers and changeover switches in automatic switching systems of 2 three-phase supply lines.

The two voltage inputs of the module are independent and insulated; each is capable of supplying the internal measuring circuit managed by the microcontroller. It reduces the number of components and improves installation safety.

Main **ATLDPS1** features include:

- Voltage value selectable via bypass terminals
- Minimum and maximum voltage tripping thresholds
- 2 single-phase L+N inputs
- 1 single-phase L+N output
- L1 priority line
- Use with motorised control units powered at 110VAC or 230VAC
- Output voltage monitoring
- Internal relay self-diagnosis
- Indicating LEDs for abnormal conditions and status of inputs and outputs.

Operational characteristics

- Rated supply voltage: 110...230VAC configurable
- Frequency: 50/60Hz
- Input voltage range: 80...300VAC
- Voltage tripping thresholds min / max: 80% and 120% of preset value
- 2 line inputs L1-L2: Single-phase, between phase and neutral
- Current output: 4A max.
- Priority line: L1 when both input values are within limits
- Fixed delay time between line switching: 0.5s
- 4 status indication LEDs for voltage of each line within limits, voltage present at output, relay output anomaly
- Mounting: 35mm DIN rail (IEC/EN/BS 60715) or screw-type by means of removable clips
- Modular housing, 3 module
- IEC degree of protection: IP40 on front; IP20 at rear.

Certifications and compliance

Certifications obtained: cULus, EAC, RCM, LOVAG. Compliant with standards: IEC/EN/BS 61010-2-030, IEC/EN/BS 61010-2, IEC/EN/BS 61000-6-2, IEC/EN/BS 61000-6-4, IEC/EN/BS 60947-1, IEC/EN/BS 60947-6-1, UL508 and C22.2 n° 14.

Communication devices

CX01

CX02

CX03

Order code	Description	Qty per pkg	Wt
		n°	[kg]
CX01	USB/optical device with PC ↔ ATL600/610/800/900 with optical port for programming data download, diagnostics and firmware upgrade	1	0.090
CX02	Wi-Fi device for connecting PC ↔ ATL600/610/800/900 with optical port for programming, data download, diagnostics and cloning	1	0.090
CX03	GSM penta-band antenna (850/900/1800/1900/2100MHz)	1	0.090

General characteristics

Communication devices for connection of LOVATO Electric products to personal computers, smartphones and tablets.

CX01

The USB/optical device, complete with cable, allows the connection of products compatible with PCs without having to disconnect the power supply from the electric panel. The PC identifies the connection as a standard USB.

CX02

By Wi-Fi connection, compatible LOVATO Electric products can be viewed on PCs, smartphones and tablets with no need for cabling.

CX03

Antenna compatible with major part of worldwide mobile networks thanks to the use of 850/900/1800/1900/2100MHz frequencies. Protection rating IP67. Fixing hole Ø10mm/3.94". Cable length 2.5mm/0.10".

For dimensions, wiring schemes and technical characteristics, refer to technical instructions in downloads section of local or global websites www.LovatoElectric.com or consult Technical support.

51C2	Connection cable PC ↔ ATL610/800/900 with EXP1011, length 1.8m	1	0.090
51C4	Connection cable PC ↔ product RS232/RS485, length 1.8m	1	0.147
EXCCON01	RS485/Ethernet converter, 12...48VDC, including kit for DIN rail fixing	1	0.400
EXCM4G01	RS485 gateway/4G modem, 9...36VDC, including cable for programming	1	0.340
For ATL900.			
RGKRR	Remote unit for status and alarms, 12/24 VDC, 12 relay outputs, pulse input	1	0.420

Software

By using the **Xpress** software, the quick setup of the switch controllers can be carried out via PC, avoiding parameter programming errors.

The parameter programming of ATL600/610/800/900 controllers can also be PC saved and quickly uploaded into another device requiring the same programming. It permits the correct operation of the system to be checked through graphic and numerical display of the measurements and controller status.

Synergy and **Synergy** softwares provide for the supervision of the ATL600/610/800/900 transfer switch controllers.

This software has structures and applications based on MS SQL relational databases, and the data can be consulted using the most popular browsers. It is a highly versatile system, simultaneously accessible to a large number of users/workstations via intranets, VPN or Internet.

See section 30 for details.

App for smartphone and tablet

The **Sam1** (Setup And Maintenance 1) application allows the user to program the controller, view alarm conditions, send commands, read measurements, download statistical data and events and send retrieved data by email. The connection is made by Wi-Fi with a smartphone or tablet using the CX02 dongle.

It is iOS and Android compatible.

For more details consult our Technical support.

For ATL500, ATL800 and ATL900, featuring built-in NFC technology, the **NFC** App LOVATO application is available for parameter programming, downloadable from Google Play Store and App Store.

EXCCON01

The EXCCON01 converter allows "Slave" devices connected on an RS485 network to interface with a "Master" featuring Ethernet port:

- Kit comprising MOXA NPORT5230 converter and DIN rail mounting accessory DK35
- Programming via web interface
- Power supply not included.

See section 31 for details.

EXCM4G01

The EXCM4G01 gateway allows "Slave" devices connected on an RS485 network to interface with a "Master" via 4G network. See section 31 for details.

RGKRR

It is an expansion unit for remote status and alarms. RGKRR can be connected at a maximum distance of 1000m/39.37" using the static output of the ATL900. RGKRR has 12 output relays, 7 normally open (2.5A 250VAC/C38) and 5 changeover contacts (5A 250VAC/B300).

See section 28 for details.

RELAY OUTPUTS					
Number of outputs	3	3	7	7	10
Configuration	- 2NO: AC1 - 4A 250VAC; 1.5A 250V~ AC15 - 1NO: AC1 - 3A 250VAC; DC1 - 3A 30VDC	- 2NO: AC1 - 8A 250VAC; AC15 - 1.5A 250VAC; - 1 changeover: AC1 - 8A 250VAC, DC1 - 8A 30VDC; AC15 - 1.5A 250VAC	- 6NO: AC1 - 8A 250VAC; AC15 - 1.5A 250VAC; B300 - 1 changeover: AC1 - 8A 250VAC, DC1 - 8A 30VDC; AC15 - 1.5A 250VAC, B300 30VDC1A Auxiliary service	- 2NO: AC1 - 12A 250VAC; AC15 - 1.5A 250VAC; B300 - 2NO: AC1 - 8A 250VAC; AC15 - 1.5A 250VAC; B300 - 3 changeover: AC1 - 8A 250VAC, DC1 - 8A 30VDC; AC15 - 1.5A 250VAC; B300 30VDC 1A Auxiliary service	- 3NO: AC1 - 12A 250VAC; AC15 - 1.5A 250VAC; B300 - 3NO: AC1 - 8A 250VAC; AC15 - 1.5A 250VAC; B300 - 4 changeover: AC1 - 8A 250VAC, DC1 - 8A 30VDC; AC15 - 1.5A 250VAC; B300 30VDC 1A Auxiliary service
Mechanical / electrical endurance	1x10 ⁷ / 1x10 ⁵ operations	1x10 ⁷ / 1x10 ⁵ operations	1x10 ⁷ / 1x10 ⁵ operations	1x10 ⁷ / 1x10 ⁵ operations	1x10 ⁷ / 1x10 ⁵ operations

TYPE	ATL100	ATL500	ATL600 - ATL601 - ATL610	ATL800	ATL900
STATIC OUTPUT					
Output type	—	—	—	—	NO
Operating voltage	—	—	—	—	10-30V
Maximum current	—	—	—	—	50mA
AMBIENT CONDITIONS					
Operating temperature	-30...+70°C				
Storage temperature	-30...+80°C				
Relative humidity	<80% (IEC/EN/BS 60068-2-78)				
Maximum pollution degree	2				
Overtoltage category	3				
Measurement category	III				
Climatic sequence	Z/ABDM (IEC/EN/BS 60068-2-61)				
Shock resistance	15g (IEC/EN/BS 60068-2-27)				
Vibration resistance	0.7g (IEC/EN/BS 60058-2-6)				
HOUSING					
Version	Modular housing 3 modules (DIN 43880)	Flush-mount			
Material	Polyamide RAL 7035	Polycarbonate			
IEC degree of protection	IP40 on front IP20 on terminals	IP40 on front IP65 with optional gasket IP20 on terminals		IP65 on front IP20 on terminals	
Weight	300g	580g	600g (ATL600 - ATL601) 680g (ATL610)	1000g	1090g
CERTIFICATIONS AND COMPLIANCE					
Certifications obtained	EAC	EAC, RCM	cULus, RCM (except ATL601), EAC, LOVAG (ATL610, ATL800, ATL900)		
Compliance with standards	IEC/EN/BS 61010-1, IEC/EN/BS 61010-2-030, IEC/EN/BS 61000-6-2, IEC/EN/BS 61000-6-4, IEC/EN/BS 60947-1, IEC/EN/BS 60947-6-1	IEC/EN/BS 61010-1, IEC/EN/BS 61010-2-030, IEC/EN/BS 61000-6-2, IEC/EN/BS 61000-6-3, IEC/EN/BS 60947-1, IEC/EN/BS 60947-6-1	IEC/EN/BS 61010-1, IEC/EN/BS 61010-2-030, IEC/EN/BS 61010-2, IEC/EN/BS 61000-6-2, IEC/EN/BS 61000-6-4, IEC/EN/BS 60947-1, IEC/EN/BS 60947-6-1, UL508 e CSA C22.2 n°14
